

Satellite radio provides variety and quality of programming that are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I desire and deserve. You also need to reverse your rulings regarding satellite television which restricts which network station can be provided to end users. It is unamerican to restrict freedom the way you have in the satellite television industry. Don't do the same thing again with radio.
